

EaglePreneurs

FGCU School of Entrepreneurship — Website Redesign

Individual Project Plan | Catalog Year 2025–2026 | Daveler & Kauanui School of Entrepreneurship

1. Project Overview

EaglePreneurs is a proposed student-centered website redesign for the Daveler & Kauanui School of Entrepreneurship (DKSOE) at Florida Gulf Coast University. The project addresses critical navigation gaps identified in the current FGCU website — including broken links, scattered graduation requirements, and the absence of interactive planning tools — replacing them with a unified, modern platform built around the needs of the enrolled student.

The platform is named EaglePreneurs, combining FGCU's Eagle mascot identity with the school's entrepreneurship mission. All content is delivered in English and designed for FGCU undergraduate students pursuing the B.S. in Entrepreneurship (120 credits, Catalog Year 2025–2026).

2. Problem Statement

The current FGCU School of Entrepreneurship website presents several documented issues that create friction for students navigating their academic path:

- Broken links (404 errors) on the foreign language requirement page and other key resources
- Graduation requirements scattered across multiple pages with no consolidated view
- No visual representation of course prerequisites or degree progression
- Dual-credit opportunities (e.g., ENT 3503 satisfying both an elective and the SCGR sustainability requirement) are not highlighted
- No tool to help students considering switching their major or adding the Entrepreneurship Minor
- No AI-powered advising support for common student questions

3. Proposed Solution — EaglePreneurs

EaglePreneurs is a four-page interactive website built with FGCU's official brand colors (Cobalt Blue #002D72, Emerald Green #007749, Gold #B9975B) following a modern,

minimalist aesthetic inspired by leading university websites such as MIT and Stanford. The platform is organized around four core student needs:

Page	Name	Key Features
1	Homepage	Hero section with campus video, AI chatbot strip, stats bar, quick-access cards, featured courses
2	Course Info	Full course catalog with filters, professor info, building/room visual map, scheduling, prerequisite tree
3	My Degree	Progress dashboard, credit counter, writing/sustainability/civic literacy trackers, service-learning hours, Switch Major tool
4	Campus & Programs	Lucas Hall tour, Runway Program incubator, Makerspace, Media Lab, competitions, schedule a visit form

4. Key Features & Design Decisions

4.1 AI Chatbot — EaglePreneurs Advisor

An AI-powered advising chatbot is positioned as the primary hero interaction on the homepage. It answers student questions about course requirements, graduation checklists, the Runway Program, and service-learning. Quick-suggestion chips guide first-time users. The chatbot also powers a dedicated 'Switch Your Major' guided flow (see Section 4.4).

4.2 Stats Bar

A four-metric summary bar placed immediately below the hero communicates the most important program facts at a glance: 80 hours of service-learning required, 120 credits to graduate, average class size of 24, and 6th largest major at FGCU. Each metric includes a supporting badge and brief description.

4.3 Dual-Credit Highlights

Courses that satisfy multiple graduation requirements simultaneously are visually flagged throughout the site with a green left border and a dual-credit badge. Key examples include:

- ENT 3114 New Venture Laboratory — Required major course AND satisfies 3 of 12 writing credits (CLWS)
- ENT 3204 Scaling Ventures — Required major course AND satisfies 3 more writing credits (CLWS)
- ENT 3503 Social Entrepreneurship — Restricted elective AND satisfies the sustainability graduation requirement (SCGR)
- STA 2023 Statistical Methods — Major prerequisite AND satisfies Gen Ed Mathematics State Core
- ECO 2013 Macroeconomics — Major prerequisite AND satisfies Gen Ed Social Sciences State Core

4.4 Switch Major / Add Minor Tool

A two-tab component inside the My Degree dashboard addresses students considering a major change. The AI Advisor tab guides students through a conversational flow: current major → switching vs. adding minor → specific requirements and steps. The Compare & Requirements tab shows a side-by-side comparison of the current and target major, a credit impact bar chart, and a checklist of switch requirements including the key restriction that B.S. Entrepreneurship majors cannot declare the ENT Minor.

4.5 Visual Brand Identity

The entire site uses FGCU's official brand palette. Cobalt Blue (#002D72) is used for primary navigation, headings, and data highlights. Emerald Green (#007749) is used for positive indicators, CTAs, and the bottom nav border. Gold (#B9975B) is used for dual-credit badges, warnings, and accent elements. The aesthetic is intentionally clean and modern — inspired by MIT and Stanford — to reflect the quality of the DKSOE program.

5. Improvements Over the Current Site

Current FGCU Site Problem	EaglePreneurs Solution
Broken links (404) on key pages	All links verified; broken pages flagged with advisor redirect
Graduation requirements scattered	Unified My Degree dashboard with progress tracking
No prerequisite visualization	Interactive prerequisite tree on Course Info page
Dual-credit savings not highlighted	Green dual-credit badges throughout courses and checklist
No major/minor switch guidance	AI-guided Switch Major flow with credit impact analysis
No AI advising support	AI chatbot on homepage with suggested questions
Building/room info not on course pages	Visual map with room numbers on Course Info page
No tour scheduling for new students	Schedule a tour form on Campus & Programs page

6. Content Scope

All content is sourced from the FGCU School of Entrepreneurship Knowledge Base (Catalog Year 2025–2026) and official FGCU brand guidelines. The following program information is covered:

- B.S. in Entrepreneurship — all 10 required courses, 9 restricted elective credits, common prerequisites, and graduation requirements

- Entrepreneurship Minor — foundation course options, 3 required core courses, upper-division elective options, and eligibility restrictions
- Full ENT course catalog with descriptions, prerequisites, credit hours, and course attributes (CLWS, SCGR, GESO, CRIT)
- FGCU General Education Program (~36 hours) with ENT-specific dual-satisfying course callouts
- University-wide graduation requirements: service-learning, civic literacy cohorts, writing (12 cr), foreign language, summer enrollment, residency
- Lucas Hall facilities: Runway Program, Makerspace (Room 203), Media Lab (Room 308), Ain Technology Hub, The Nest
- Programs and competitions: CEO Club, Azul's Innovation Challenge, Sustainable Futures Challenge, Veterans Florida Entrepreneurship Program

7. Development Roadmap

Phase	Deliverable	Status
1	Homepage (complete)	Done — hero, chatbot strip, stats bar, video section, course cards, quick-access cards, footer
2	Course Info page	In progress — full catalog, filters, professor info, room visual map, prereq tree
3	My Degree dashboard	Planned — credit tracker, all graduation req. checklists, Switch Major tool
4	Campus & Programs page	Planned — Lucas Hall tour, Runway, Makerspace, schedule a visit form
5	AI Chatbot integration	Planned — full knowledge base integration, Switch Major conversational flow

8. Conclusion

EaglePreneurs transforms the FGCU School of Entrepreneurship's online presence from a static informational site into a practical, student-first planning tool. By consolidating graduation requirements, highlighting strategic course selections, and providing AI-powered advising, the platform directly reduces the friction students face when navigating the B.S. in Entrepreneurship program. The design is intentional — modern, clean, and fully aligned with FGCU's official brand identity — while remaining simple enough for any student to use from day one.
